## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of Species I in Paper No. 1103 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

✓  
Cancel claims 11-19 (drawn to a non-elected Species II, there being no examinable generic or linking claim).

In claim 1, line 2, change "of plurality" to --of a plurality--.

On page 2, line 10, change "semiconductor wafer" to  
--semiconductor wafer representation 1103--.

On page 6, line 2, change "actual the defects" to --the actual defects--.

On page 6, line 4, change " x 5% " to -- x  $\pm$  5% --.

On page 6, line 5, change " y 5% " to -- y  $\pm$  5% --.

On page 6, line 6, " z 5% " to -- z  $\pm$  5% --.

***Allowable Subject Matter***

3. Claims 1-10 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The prior art undoubtedly discloses statistical sampling of defects and categorization of sampled defects, including the idea of a statistically significant sampling. However, the prior art fails to disclose applicant's claimed methodology particularly characterized by the unique-in-particular-meaning step of "taking statistically-based sampling" in the context of the instant claims having unique scope based on the specific written description of the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The publications and patents cited are related as disclosing methodology for sampling and inspecting defects on a semiconductor wafer, but none of the references disclose defect sampling as specifically being a "statistically-based sampling" when "statistically-based" is ascribed a specific meaning in the context of applicant's disclosure, and is not merely a "statistical sampling" or "statistically significant sampling," as are known in the art of sampling and inspecting wafers for defects.
